The HomeWorks QS wired Palladiom keypad allows the user to control lights, shades/draperies, temperature, and equipment by others. The keypad is wired to a HomeWorks QS processor on the QS link.

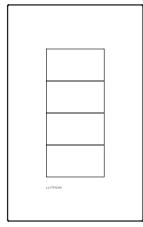

Large buttons are easy to use and button engraving is easy to read. Buttons with white, backlit engraving make it easy to find and operate the keypad in low light conditions. Keypads are available in a variety of colors, finishes, and button marking options.

Status of active button press or scene is indicated through intensity of backlighting which is configurable through the HomeWorks QS software. Dynamic Backlighting Management (DBM) automatically adjusts backlight intensity based on ambient lighting conditions. It can also be programmed in the HomeWorks QS software to adjust intensity by time of day or button presses.

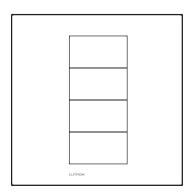

See How to Build a Model Number (Keypads).

HomeWorks QS Wired Palladiom Keypad

Specifications

Model Numbers	See How to Build a Model Number (Keypads).
Power	24-36 V== 30 mA
Typical Power Consumption	0.7 W Test conditions: all backlights on medium intensity, two LEDs on (two presets active), keypad powered at 24 V===
Regulatory Approvals	Lutron Quality Systems registered to ISO 9001:2008. Complies with UL 508; IEC 60669-2-1; and CSA C22.22 No. 14-13
Environment	Ambient operating temperature: 32 °F to 104 °F (0 °C to 40 °C), 0% to 90% non-condensing relative humidity. Indoor use only.
Communications	SELV/PELV/NEC® Class 2 wiring connects keypads to other devices on the QS link. Each keypad counts as 1 device on the QS link. Each keypad column consumes 1 Power Draw Unit (PDU) on the QS link. For complete information, see "Power Draw Units on the QS link" (Lutron P/N 369405).
ADA Standard	Control operation complies with ADA standards for an accessible design.
ESD Protection	Meets IEC 801-2. Tested to withstand 15 kV electrostatic discharge without damage or memory loss.
Power Failure	Power failure memory: should power be interrupted, the keypad will return to its previous state when power is restored.
Mounting	Typical U.S. style wallbox dimensions: 3.7 in (95 mm) H \times 1.8 in (46 mm) W \times 2.8 in (70 mm) D. Typical square style wallbox dimensions: 75 mm H \times 75 mm W \times 25 mm D. Typical round style wallbox dimensions: ϕ 68 mm \times 25 mm D. See Mounting on page 11 for more details.
Wiring	SELV/PELV/NEC® Class 2
Terminals	Each terminal accepts up to two 18 AWG (1.0 mm ²) wires.
Warranty	www.lutron.com/TechnicalDocumentLibrary/warranty.pdf www.lutron.com/TechnicalDocumentLibrary/Intl_warranty.pdf

Design Features

- Adjustable back-light intensity.
- Faceplate snaps on with no visible means of attachment.
- Use Faceplate or Button Kits to change color or engraving.
- Field-changeable button and faceplate assemblies allow for customization. See How to Build a Model Number (Button Kits) as some restrictions apply.
- IP20 Rating.

Engraving Options

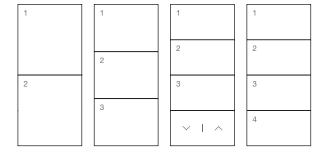

The Palladiom Keypad has engraving options ideal for many scenarios. The following information will help you determine which engraving option is best-suited to your needs.

Predefined Custom Engraving

Predefined project engraving is for instances when the customer knows the engraving details at the time of purchase and does not wish to order two sets of button kits. To select this option, use engraving option "E" when ordering the keypad. **Note**: Orders will not be shipped until engraving details are received.

Generic Engraving and Post-Defined Custom Engraving

When engraving details are not known or specified at the time an order is placed, the generic engraving icons shown below will be sent to provide the customer with a usable keypad until the custom engraving details are determined. This keypad will be shipped with an engraving credit for ordering a custom-engraved button kit at a later time.

How to Select a Palladiom Keypad

Examples of keypad and faceplate configurations are shown below.

^{*} Model numbers must be ordered as separate pieces and assembled. See Keypad Assembly.

HomeWorks QS Wired Palladiom Keypad

Keypad Assembly

Tools Required: Phillips head screwdriver (not included)

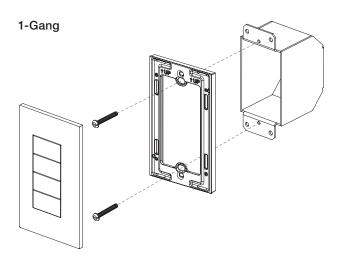

- 1. Place button kit on back of faceplate.
- 2. Align bulk unit over button kit and faceplate.
- 3. Assemble using 4 screws (provided).
- 4. Repeat steps 1-3 for each base unit.

QS Link Wiring

- Use SELV/PELV/NEC® Class 2 wiring to connect keypads to the QS link.
- Connect two 22 AWG (0.5 mm²) shielded, twisted pairs of wires to terminals 3 and 4 of the keypad control link connector. Shielding (drain) of the twisted-pair wires must be connected together as shown, but do not connect the shielding to earth/ground or to the keypad and do not allow the shielding to contact the grounded wallbox.
- The total length of wire on a QS wired link is not to exceed 2000 ft (610 m).

Note: Use appropriate wire connecting devices as specified by local codes.

- Each base unit model number counts as 1 device on the QS link.
- Each button column of a QS wired Palladiom Keypad consumes 1 power draw unit (PDU) on the QS link. For complete information, see "Power Draw Units on the QS Link" (Lutron P/N 369405).
